Second and third generation managing directors: Helmut, Werner and Joachim Link (left to right)

Interstuhl

The idea of a Swabian businessman and developer is embarking on an international journey. It's all about attractive and healthy seating, whether we use it to work, think, discuss, argue or relax.

It's all about a chair that actively supports us at what we are doing.

Interstuhl innovations are conceived, tested and developed in an interesting mix of think-tank and expert laboratory. That is what makes us so unique. Simply stated by Werner Link, the company's owner and Managing Director: "We understand more about sitting". An honest statement that has its origins back in 1961 when the assignment was to create relaxing seating for the workers of a textile factory. The focus ever since has been on expertise and

a genuine interest in our products and the people who use them. We remain true to the spirit of our brand by collaborating with leading institutes on the scientific development of our products. This has resulted in a collection that is unparalleled in its breadth and depth. He who understands more about sitting, has studied it in detail. Interstuhl is such a company and will remain so: a world away from corporate affiliations and concerns about globalization. Over 600 employees craft exclusive German goods and they do so in Germany.

Anyone who understands more about sitting should rise up. Rise above the tired old clichés about quality and materials. Interstuhl is what it is, and what it is is very good.

Low backrest

Shouldn't even more good ideas take a seat? Axos for managers has arrived - with a clarity of design and purpose. With the latest knowledge at hand. There are many seats for decision-makers but only a few with such a clear profile. Innovative, upstanding, and to the point. A seat to identify with – and a lot of privileges. An office chair constitutes the framework for the headwork.

A head which it must effectively support, a head that must make lasting decisions, and a head that must think in terms of economy: create teams, lead partners. An emotional and objective seat of intelligence. For people who identify with reducing things to the beauty of the essential form, but still generous in the details. People who want to have all the comforts be-

neath them. There are many occasions for lying back to think about things during the day - to sort your ideas or to find the peace and quiet to concentrate on the issue, escape the hectic pace for a moment. It is in fact critical that you do.

Dynamic seating frees your head too.

Axos enriches any room, any working situation. Axos emanates competence and a love of quality, both of which are important preconditions for communication in efficient economic systems. Every detail has been excellently crafted. For example the flush leather inlay, the high-quality workmanship of the leather and many more details that display an appreciation of value.

The next position is the best

From the seating specialists

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preven-

tive medicine and eases the pain for those who already suffer. What does an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief.

Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new

philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

"You can sit however you want. Just sit on the right chair." Each new product development with leading research institutes reconfirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

1 Dynamic motion

The dynamic motion enables a dynamic movement. In every position the posture is guaranteed a body opening angle of at least 90 degrees.

2 Sprung column

Prevents jarring even when the chair is in its lowest position, protecting your lower vertebrae.

3 Weight adjustment

The individually adjustable counter-pressure of the backrest permits correct sitting for both light and heavy users.

4 Headrest

Provides valuable relief to the neck and shoulder muscles when reclining.

Take a seat and take your time.
Axos lends a top-class
atmosphere to rest areas and
discussion sessions, a space
concept for any sojourn and
relaxed waiting.
