PIOS

ENJOY SEATING PERFORMANCE.

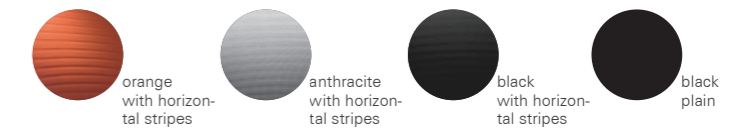

EFFICIENT CONFERENCING MEANS INTERLINKING COMMUNICATION.

If you contribute a lot, you can expect maximum performance. This is even more true when it comes to the subject of sitting. If you are relaxed while you are sitting down, you are open to new ideas. While sitting on Pios, participants at conferences, trainings and seminars concentrate on the topic and not on the way they are sitting. The elegant and intelligent 3D-mesh of Pios creates comfort, freedom and lightness all at once. Pios moulds itself to the body with a breathable closeness. This extra of performance releases more performance. And this is true for everyone who sits on Pios.

Comfort – intelligently interwoven. The 3D-mesh of Pios provides great comfort and support. In spite of being so light, it gives great support to the body and prevents tension and early tiredness. Four different mesh colours are available: black, anthracite and - for all who not only look for comfort but also for an optical focus - orange.

PERFECT TECHNIQUE AND LIGHT DESIGN

Pios is the intelligent solution for the flexible use of spaces: in the morning a meeting, a training in the afternoon, and in the evening a reception. These situations demand high-performance seating solutions that are light and flexible, and that can be stored in a small space. With its elegant tubular design and airy mesh covering, Pios is an ace for transport and stacking. So it opens up plenty of room for a constant supply of new spaces.

Logistics thrive on efficiency. Pios is light, stackable up to 6 chairs und can be stowed away in a flash.

5W10

Pios makes you independent. Pios combines freedom with the best support for your body. With Pios, no one needs to be tied to the table. Its optional armrests ensure a relaxed posture even when you are not sitting at the table. Regardless of your decision, Pios still remains Pios: stackable, light and comfortable – even with armrests.

PRODUCT OVERVIEW, DESIGN, ENVIRONMENT

Conference chairs

Pios was created by the Industrieformen Studio of **Hans-Georg Piorek**. The credo of the designer is: "Never believe that something is good enough." Driven by this continuous search for optimisation, Pios was created. Piorek maintains the proven, combines it with innovative ideas and develops something uniquely new. A design which is driven by efficiency, comfort and a stimulation of all senses.

Cantilever frame, continuous 3D-mesh, with seat upholstery, armrests, stackable

Pios is exceedingly efficient: creative, ergonomic, economic but also ecological. Sustainability begins already while developing Pios. Up to 98 % recyclable material is being used in its completely environmentally responsible production. Not without reason, Pios has been awarded the Blue Angel certificate. All divisions of Interstuhl obey to strict environmental guidelines. Already in 1995 as one of the first companies in the office furniture industry, Interstuhl has been awarded the EMAS certificate and has also been awarded repeatedly for their excellent environmental management. You can find further information concerning the environmental balance of Pios in our environmental data sheet.
