Office Concept

Interpret™ is an innovative desking system designed to work for any person, any workspace, anywhere in the world. Adaptable and scalable, Interpret allows you to make the office your own.

Based on a core frame platform and a concise set of components, Interpret can be built upon, extended or fully reconfigured in response to changing demographics, advances in technology and evolving work patterns.

Interpret also addresses the readiness of people and organizations to embrace benching by introducing new planning concepts and capabilities, while drawing from the legacy of classic systems furniture.

Interpret allows for a breadth of office settings. In a simple benching configuration, sliding translucent screens define boundaries and allow users to dial privacy up or down to facilitate group interaction or personal work.

The versatility of Interpret lies in its unique frame structure, which supports all essential elements above and below the surface. An accessory beam runs the length of the structure to accept screens and monitor arms. Cubbies suspend from the structure and components affix to the bench ends. Power/data is delivered via an integrated rail, a clean solution that allows for high-density technology support.

Interpret offers a mix of materials that contribute to aesthetics, function and sustainability goals. Metal storage components have a light, clean look and accept a range of attractive finishes. Wood doors bring an upscale look to a metal cabinet case. Close attention to design detail renders simple materials beautiful.

Accent colors energize a space. Vivid color applied to Interpret screens, screen frames and the leg structure identify and distinguish work areas, or brand and enliven the office landscape. A comprehensive casual screen program, placed along the spine of the bench or laterally, provides opportunity for effective use of color-blocking or color gradation.

Interpret creates transitional configurations that combine the space-division benefits of a panel-based system with the flexibility of benching. Should work needs change, the nature of the Interpret frame evolves back to an open benching plan using the same frame structure.

Interpret escapes the look of a bench. The sturdy frame creates a unique benching structure comprised of end-mounted overlay screens, up-mounted storage and extended returns that expand workspace. Casual screens define boundaries and create corridor privacy. Storage finishes can be applied to six color zones, offering the ability to create unique, custom settings.

Interpret makes it possible to create exactly the workspace required. Lightly scaled functional screens provide 51-inch-high seated privacy. These vertical surfaces are available as a whiteboard, tackboard, accessory screen and in wood or metal. District credenzas and cabinets integrate with Interpret, further defining space and creating a furniture look and feel.

To permit maximum flexibility and creative planning, Interpret offers the option of 120-degree workstation clusters. Clusters connect at the end of Interpret benches via a single center leg, freeing up space beneath the worksurface to allow a generous amount of leg room.

Interpret tailors the look of a bench to complement interior architecture. A curve leg option emphasizes clean lines, a refined aesthetic and close attention to design detail.

Features

End-Mount Options

Interpret accepts multiple end-mount options to extend work areas and create accessible shared or user-specific storage nooks.

Peninsula Worksurface
Peninsula worksurfaces create a place for casual meetings at the end of an Interpret bench. It also functions as a surface for end-mounted storage cabinets.

Wood End-Mounted Storage
End-mounted storage cabinets suspended below the worksurface provide shared access to materials.

End-Mounted Storage
Metal end-mounted storage cabinets accept wood, metal or glass sliding doors with handles in accent colors to elevate the clean aesthetic.

End-Mounted Storage
Wood end-mounted storage positioned above the surface can face inward for user access.

Tackboard End-Mounted Storage
Wood end-mounted cabinets can accept a tackboard affixed to the back for added functionality.

Tackboard End-Mounted Storage
Metal end-mounted storage features an integrated tackboard or whiteboard surface at the back for enhanced functionality and personalization.

Features

Storage

Interpret offers varied storage options that fit different applications, including spine- and end-mounted storage and freestanding and suspended units – all available in metal and wood to ensure a balance of functional and aesthetic appeal.

Accent colors allow for a unique look tailored to the brand or other design concept. Storage units can be painted in sections, including the outer case, interior of an open case, drawer front, base and two-toned handle, offering custom finish combinations.

Options

Interpret offers a variety of design elements that address specific functional requirements, as well as aesthetic preferences.

Laptop Locker

The Laptop Locker attaches to a credenza and provides a secure place to store personal devices.

Plinth Base

The Plinth skirt base option creates a clean, to-the-floor look.

Lateral Mounted Storage

The Lateral Mounted Storage runs perpendicular to the worksurface and provides storage, privacy and a standing-height meeting surface.

Height-Adjustable Worksurface

The Height-Adjustable Worksurface adjusts from 29 to 32 inches high. Surfaces within the same frame structure may be adjusted independently.

Curve Leg

Interpret offers a Straight, Angled and Curve leg style. The Curve leg is available open and with glass or wood infill.

Leg Base

Storage base options are available to address aesthetic and functional requirements. Elevated feet enhance a light, floating presence.

Caster Base

A caster base option provides the mobility often looked for in today's dynamic office.

Cubby & Accessory Dock

The Cubby provides compact storage for personal belongings. It is available suspended or freestanding with three base options. The Accessory Dock organizes stationery and stores and powers mobile devices.

Sliding Worksurface

Users can control Sliding Worksurfaces that may be pulled out 5 inches for easy access to below-surface power/data.

Power Access Door

The Power Access Door may be specified in accent colors for the entire door or for trim only. Designed to retract into the worksurface, it optimizes worksurface space and provides easy user access.
